

# Consett Academy – H&SC

## Curriculum 2022-23

### **SUBJECT INTENT STATEMENT**

H&SC can be split into two parts. Health education is about the treatment of illness and medical conditions in hospitals, health centres and in the community. Social care is the care and support of vulnerable people, usually in the community.

The BTEC Tech Award for Health & Social Care is a hands-on course that gives learners a taste of what the sector is like, as well as the skills and confidence to succeed in their next steps. With the BTEC Tech Award in H&SC, learners can get to know the core care values, develop valuable skills and explore potential careers.

This qualification aims to develop knowledge, awareness and understanding of the similarities and differences between health, social care and young people's settings.

We create healthy students who can explore the different factors and care values that influence health and wellbeing.

H&SC empowers students to consider and discuss questions related to the meaning of life, the nature of humanity and the recognition of individual worth.

We broaden students' perspective, so that they can recognise and understand that values, attitudes and beliefs about what is right or wrong will differ in both individuals and in communities.

We develop students' ability to have tolerance and respect for those with different beliefs and customs. We ensure students comprehend the impact of social, emotional and cultural factors on health and wellbeing and how society can influence people's lives.
